2023 SBCS Partner Report

Findings from the Federal Reserve's 2022 Small Business Credit Survey
About the Small Business Credit Survey

What is the Small Business Credit Survey (SBCS)?

The SBCS is an annual survey of firms with fewer than 500 employees. The SBCS, a collaboration of all 12 Federal Reserve Banks, provides timely information about small business conditions to policymakers, service providers, and lenders. In 2022, the survey reached approximately 14,000 small businesses, gathering insights about the performance, challenges, and credit-seeking experiences of firms across the United States. The SBCS is not a random sample; results should be analyzed with awareness of potential biases that are associated with convenience samples.

How are SBCS responses weighted?

Because the SBCS is not a random sample, data for the United States and for each state are weighted in order to be more representative of the overall population of small businesses. Data are weighted so that the weighted distribution of firms in the SBCS matches the distribution of the small employer firm (1 to 499 employees) population by number of employees, age of firm, industry, geographic location, gender of owner(s), and race/ethnicity of owner(s). For more information about weighting, please see the Methodology section of the 2023 Report on Employer Firms, which is available at https://www.fedsmallbusiness.org/survey/2023/report-on-employer-firms.

Note: The SBCS weighting methodology cannot be applied to organization-level data, so the data for firms from your organization in this report are unweighted.
Usage of partner reports

Organization-level data may be shared throughout your organization, including with boards of directors and advisory committees. Please do not share organization-level data outside of your organization.

The sample for the SBCS is not selected randomly; thus, the SBCS may be subject to biases not present with surveys that do sample firms randomly. To control for potential biases, we weight national- and state-level data so the weighted distribution of firms in the SBCS matches the distribution of the small firm (1 to 499 employees) population in the given geographic area by number of employees, age, industry, geographic location (census division and urban or rural location), gender of owner(s), and race or ethnicity of owner(s).

The SBCS weighting methodology cannot be applied to organization-level data, so the data in this report are unweighted. As such, organization-level data is for use internal to your organization only.

All small employer and nonemployer firms from your organization that responded to the 2022 Small Business Credit Survey are included in the sample for your organization. Small employer firms have between one and 499 employees in addition to the owner(s). Nonemployer firms have no employees other than the owner(s). Percentages of employer and nonemployer firms are provided in the Demographics section of this report. Within this report, your organization’s data are displayed alongside data for the national SBCS sample of employer firms.
Table of Contents

Firm Performance
Data on revenue and employment change in the prior 12 months and expectations for the next 12 months

Challenges
Data on financial challenges, operational challenges, and actions taken by firms in response to challenges

Debt and Financing
Data on outstanding debt, use of financial services, and firms’ credit-seeking experiences

Demographics
Data on firm and owner characteristics

Appendix A
Partner Report FAQ

Appendix B
SBCS definitions
Firm Performance

Data on revenue and employment change in the prior 12 months and expectations for the next 12 months
Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. Prior 12 months is approximately September–November 2021 through September–November 2022. See Appendix B for definitions of SBCS time references.
Employment change, prior 12 months
(% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. Prior 12 months is approximately September–November 2021 through September–November 2022. See Appendix B for definitions of SBCS time references.
Profitability, end of 2021 (% of firms)

<table>
<thead>
<tr>

Notes: Respondents could select multiple response options. Select response options shown. Prior 12 months is approximately September–November 2021 through September–November 2022.
Actions taken in response to financial challenges
(% of firms with financial challenges)

Notes: Respondents could select multiple response options. Select response options shown.
Debt and Financing

Data on outstanding debt, use of financial services, and firms' credit-seeking experiences
Amount of outstanding debt, at time of survey (\% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. Categories have been condensed and simplified for readability.
Use of financial services providers
(% of firms)

Notes: Respondents could select multiple response options. Select response options shown. Financial services providers are those at which the firm has an account or uses other financial services, including loans and payments processing. See Appendix B for lender definitions.
Sources of funding, past five years (% of firms)

Notes: Respondents could select multiple response options. Select response options shown. See Appendix B for lender definitions.
Types of pandemic-related financial assistance sought, prior 12 months (% of firms)

Notes: Respondents could select multiple response options. "Financial assistance" includes all forms of pandemic-related financial assistance available in the 12 months prior to the survey (for example, EIDL, state/local loan and grant programs). See Appendix B for definitions of SBCS time references.
Applications for loans, lines of credit, and merchant cash advances

(\% of firms)

- Applied for a loan, line of credit, or MCA: 40% (Sample organization: N=150, 22%; U.S. employer firms: N=7,864)
- Did not apply: 60% (Sample organization: N=150, 78%; U.S. employer firms: N=7,864)
Approval rate for loans, lines of credit, and merchant cash advances
(% of loan, line of credit, and cash advance applicants)
Demographics

Data on firm and owner characteristics
Age of firm (% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. SBCS responses throughout the report are weighted using census data to represent the U.S. small employer firm population on the following dimensions: firm age, number of employees, industry, geography, race/ethnicity of owner, and gender of owner.
Age of primary owner (% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. Age categories have been condensed and simplified for readability.
Annual revenues (% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. Revenue size categories have been condensed and simplified for readability. Actual categories are ≤$25K, $25,001–$50K, $50,001–$100K, $100,001–$250K, $250,001–$500K, $500,001–$1M, $1,000,001–$5M, $5,000,001–$10M, and >$10M.
Credit risk (% of firms)

<table>

<td>6%</td>
</tr>
</tbody>
</table>

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. See Appendix B for credit risk definitions.
Gender of owner(s) (% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. SBCS responses throughout the report are weighted using census data to represent the U.S. small employer firm population on the following dimensions: firm age, number of employees, industry, geography, race/ethnicity of owner, and gender of owner.
Geographic location (% of firms)

Notes: Urban and rural definitions come from U.S. Department of Agriculture Rural-Urban Commuting Area codes. SBCS responses throughout the report are weighted using census data to represent the U.S. small employer firm population on the following dimensions: firm age, number of employees, industry, geography, race/ethnicity of owner, and gender of owner.

2023 Partner Report: Findings from the 2022 Small Business Credit Survey
Industry (% of firms)

Notes: Select response options shown. Percentages across response options may not sum to 100 within firm categories because of rounding. SBCS responses throughout the report are weighted using census data to represent the U.S. small employer firm population on the following dimensions: firm age, number of employees, industry, geography, race/ethnicity of owner, and gender of owner. See Appendix B for industry definitions.

2023 Partner Report: Findings from the 2022 Small Business Credit Survey
Number of employees (% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. SBCS responses throughout the report are weighted using census data to represent the U.S. small employer firm population on the following dimensions: firm age, number of employees, industry, geography, race/ethnicity of owner, and gender of owner.
Race/ethnicity of owner(s)
(% of firms)

Notes: Percentages across response options may not sum to 100 within firm categories because of rounding. See Appendix for definitions of race and ethnicity. SBCS responses throughout the report are weighted using census data to represent the U.S. small employer firm population on the following dimensions: firm age, number of employees, industry, geography, race/ethnicity of owner, and gender of owner.

Partner Report FAQ
Frequently Asked Questions (FAQ)

How many responses are needed to show data?

A question (or category) must have at least 30 responses in order to show the data for that question. When the sample size is below 30, data are not shown.

Why do the subcategories within a category not always add up to 100 percent?

Possibility 1: Respondents could select more than one option.

In some cases, a question will ask respondents to select all answer choices that apply. As a result, answer choices are not mutually exclusive, since some firms will select more than one option. This causes the sum of the subcategory percentages to exceed 100 percent.

Possibility 2: Percentages are rounded to whole numbers.

In other cases, a question’s answer choices are mutually exclusive, but the sum of the percentages equals 99 percent or 101 percent. This is due to rounding the percentages to a whole number; the sum of the actual, unrounded percentages is 100 percent. For example, if answer choice “A” has 10.4% of responses, answer choice “B” has 70.3% of responses, and answer choice C has 19.3% of responses, the sum of these percentages is 100%. Yet, the sum of the rounded percentages (10+70+19) is 99 percent.
Frequently Asked Questions (FAQ)

Which firms are included in my organization's data?

All small employer and nonemployer firms from your organization that responded to the Small Business Credit Survey are included in the sample for your organization. Small employer firms have between one and 499 employees in addition to the owner(s). Nonemployer firms have no employees other than the owner(s).

Which firms are included in comparison geographies?

Within this report, your organization’s data are displayed alongside data for the national SBCS sample of employer firms. However, within the accompanying Excel file, comparisons to SBCS responses at both the national and state level are included. While nonemployer firms are included in the organization’s sample, only employer firms are included in the data for comparison geographies.
Appendix B

SBCS definitions
In the SBCS, “credit risk” refers to a self-reported business credit score or personal credit score, depending on which is used to obtain financing for the business. When firms use both, the weaker credit score is used to categorize the firm.

- **Low credit risk**
  - Firms with either a business credit score of 80-100 or a personal credit score of 720 or greater.

- **Medium credit risk**
  - Firms with either a business credit score of 50-79 or a personal credit score of 620-719.

- **High credit risk**
  - Firms with either a business credit score of 1-49 or a personal credit score of less than 620.
Definitions: Financial services providers & lenders

Questions in the SBCS ask respondents about their use of and experiences with lenders and other financial services providers. Because respondents may not have a uniform understanding of the terms used in the SBCS, the questionnaire provides examples and explanatory information about the response options. The financial services providers, lenders, and lender categories referenced in the survey are defined as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Large bank, small bank</td>
<td>Large banks are defined as those with at least $10B in total deposits; small banks are those with less than $10B in total deposits. For applicable questions, respondents are shown a list of large banks operating in their state to assist them with proper classification of their institution.</td>
</tr>
<tr>
<td>Finance company</td>
<td>Finance companies are nonbanks that provide loans, leases, and other financial services. Examples include mortgage companies, equipment dealers, insurance companies, and auto finance companies.</td>
</tr>
<tr>
<td>Finance company that is not a bank</td>
<td>Examples include payroll services and payments processing companies, fintech lenders, and finance companies.</td>
</tr>
<tr>
<td>Financial institution or lender</td>
<td>This category includes all bank or nonbank financial intermediaries, such as banks, finance companies, online lenders, and credit unions.</td>
</tr>
<tr>
<td>Government funding sources</td>
<td>Examples include the Small Business Administration (SBA), the U.S. Department of Agriculture (USDA), and state agencies.</td>
</tr>
<tr>
<td>Online lender/fintech lender</td>
<td>Online lenders/fintech lenders are nonbanks that operate online. Examples include OnDeck, CAN Capital, Paypal Working Capital, and Kabbage.</td>
</tr>
<tr>
<td>CDFI</td>
<td>Community development financial institutions, or CDFIs, are financial institutions that provide credit and financial services to underserved markets and populations. CDFIs are certified by the CDFI Fund at the U.S. Department of the Treasury.</td>
</tr>
</tbody>
</table>
Definitions: Industry categories

**Business support and consumer services**
Includes NAICS codes: 56, 81
Examples of businesses: Barbers, business event planning, cleaning services, repair services, salons, spas, travel agencies

**Finance and insurance**
Includes NAICS codes: 52
Examples of businesses: Loan brokers, portfolio management firms

**Healthcare and education**
Includes NAICS codes: 61, 62
Examples of businesses: Counseling, day cares, dentists, professional training, sports instruction, tutoring

**Leisure and hospitality**
Includes NAICS codes: 71, 72
Examples of businesses: Bars, caterers, fitness centers, gyms, hotels, performing arts venues

**Manufacturing**
Includes NAICS codes: 31, 32, 33
Examples of businesses: Electronics manufacturers, engraving, packaging, print shops, textile manufacturers

**Nonmanufacturing goods production and associated services**
Includes NAICS codes: 11, 21, 22, 23, 42, 48, 49
Examples of businesses: Construction, farming, logistics, mining, taxis, wholesale suppliers and distributors, warehousing

**Professional services and real estate**
Includes NAICS codes: 51, 53, 54, 55
Examples of businesses: Book publishers, consulting, notaries, real estate agents, vehicle rentals

**Retail**
Includes NAICS codes: 44, 45
Examples of businesses: Boutiques, craft stores, ecommerce, grocers, hardware stores
Definitions: Race and ethnicity

The SBCS uses U.S. Census-defined categories of race and ethnicity. We use simplified, mutually exclusive race/ethnicity labels to indicate that more than 50% of the business is held by owner(s) of the given race/ethnicity. As such:

- "Firms owned by people of color" refers to businesses majority-owned by owners who identified themselves in the SBCS as American Indian or Alaskan Native, Asian, Black or Hispanic.

- "White-owned firms" refers to businesses majority-owned by owners who identified themselves as non-Hispanic in the SBCS and who identified their race as white, Middle Eastern, or Northern African.
Survey questions in the SBCS ask respondents to reference specific time periods. Most questions ask about respondents’ experiences in the 12 months prior to the time of their response. In some cases, questions ask about conditions at the time of their response. Finally, some questions ask about respondents’ expectations in the 12 months following the time of their response. The time periods referenced in the survey are defined as follows throughout this report:

Prior 12 Months:
The 12 months prior to the fielding of the survey. For the 2022 SBCS, this is approximately September-November 2021 through September-November 2022.

At Time of Survey:
September through November 2022.

Next 12 Months:
The 12 months following the fielding of the survey. For the 2022 SBCS, this is approximately September-November 2022 through September-November 2023.
Definitions: Type of firm

Employer firms have between one and 499 employees in addition to the owner(s).

Nonemployer firms have no employees other than the owner(s) of the firm. Nonemployer firms may employ contract workers.
